

NORTHERN ROOTS NURSERY

2019 NURSERY STOCK

Our starts are grown from feminized seed produced in Vermont by Northern Roots Nursery. Our breeding selections are based on results and desirable traits shown throughout the year in various regions of the green mountain state.

CEIBA

CHERRY WINE X AC/DC

BOUTIQUE VARIETIES

Ceiba Is a Harle Tsu dominant Hybrid September harvest. Great for boutique flower production, or extraction purposes dense flowers, high terpene, trichome encrusted.

[Cannatonic (ACDC pheno) x HarleTsunami (Harlequin x Sour Tsunami)] x HarleTsunami

Plant size & structure: When planted in late Spring plants can reach 6' tall and 5' in diameter. Very hardy, stout plants with all terminal flowers producing spear-like colas.

Flower response: Photoperiodic
Harvest window: September 7 – September 30 outdoors, 8 weeks indoor/light deprivation

Flower description: Longer internode spacing with flowers that fill in to produce spear-like colas; dense, trichome encrusted flowers; aroma reminiscent of sweet melons, earthy kush, fuel, and spicy pine.

Cherry wine x AC/DC Cherry Wine Hybrid, high terpene large plants suitable for larger scale biomass production. Mold and mildew resistant

[(Cherry wine x AC/DC) x Kentucky ditch weed] x Cherry wine

Plant size & structure: When planted in late Spring plants can reach 7' tall and 5' in diameter. Very vigorous, tall plants with symmetrical branching with strong stem

Flower response: Photoperiodic
Harvest window: October 7 – October 31 outdoors, 9-10 weeks indoor/light deprivation

Flower description:Mild density, elongated colas, fruity aroma some flowers will be purple with pink hairs.
